

## HEALTH ALERT: STOMACH VIRUS

*Also called Norovirus*

- SIGNS: Nausea, diarrhea, vomiting, stomach pain, cramping, fever.
- TRANSMISSION: Direct or close contact with contaminated secretions.
- INCUBATION: 12 - 72 hours.
- TREATMENT: Keep hydrated. If symptoms do not get better in 2 -3 days, notify your child's doctor.
- EXCLUSION: As per CDC to help prevent the spread the child should stay home for 48 hours and be fever free in order to return.
